DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Alan W. Young on 02/10/09.

Claim:

1. (Currently amended) A computer-implemented method for a credit grantor to manage a credit of a credit requestor, comprising the steps of:

upon the occurrence of an event:

assigning a Credit Classification to the credit requestor, the Credit Classification being related to a credit risk of the credit requestor;

determining a Type of Review to carry out for the credit requestor based upon a nature of the event;

providing a plurality of checklists of data items required to be collected, the data items of each provided checklist being determined at least by a combination of the assigned Credit Classification and the determined Type of Review;

storing the plurality of checklists of data items to be collected;

Art Unit: 3691

selecting, using a computer, one of the stored plurality checklists of data items based upon the combination of the assigned Credit Classification and the determined Type of Review;

creating or updating a case folder for the requestor, the case folder including the selected checklist of data items to be collected;

collecting each required data item of the selected checklist and storing each collected data item in the case folder;

analyzing the collected data items in the case folder according to a score sheet and a workflow, the score sheet being determined at least by the combination of the assigned Credit Classification and determined Type of Review and calculating a credit score for the credit requestor, and

generating a recommended action based upon the calculated credit score.

Allowable Subject Matter

Claims 1-27 and 34-87 are allowed.

Examiner's Statement of Reason for Allowance

The following is a statement of reasons for the indication of allowable subject matter.

The most relevant references are the Walker (“*Walker*”) and Larche et al (“*Larche*”) references.

Walker reference teaches a computer-implemented method and system for a credit grantor to manage a credit of a credit requestor, comprising the steps of; upon the occurrence of an event (col. 1, lines 16-19), assigning a Credit Classification to the credit requestor, the Credit

Art Unit: 3691

Classification being related to a credit risk of the credit requestor (col. 6, lines 47-64);
determining a Type of Review to carry out for the credit requestor based upon a nature of the event (col. 1, lines 30-33 and 55-57);

Larche reference teaches the concept of providing a plurality of checklists of data items required to be collected, the data items of each provided checklist being determined at least by a information entered by a user; storing the plurality of checklists of data items to be collected; selecting one of the plurality of checklists of data items to be collected based upon the information entered by a user (col. 10, lines 1-11 Figs. 12 &13).

Claims 1, 34 and 61: The *Walker and Larche* references fail to teach a method (and corresponding system and machine readable medium) for a credit grantor to manage a credit of a credit requestor comprising the steps of:

providing a plurality of checklists of data items required to be collected, the data items of each provided checklist being determined at least by a combination of the assigned Credit Classification and the determined Type of Review;

storing the plurality of checklists of data items to be collected;

selecting, using a computer, one of the stored plurality checklists of data items based upon the combination of the assigned Credit Classification and the determined Type of Review;

creating or updating a case folder for the requestor, the case folder including the selected checklist of data items to be collected;

collecting each required data item of the selected checklist and storing each collected data item in the case folder;

Art Unit: 3691

analyzing the collected data items in the case folder according to a score sheet and a workflow, the score sheet being determined at least by the combination of the assigned Credit Classification and determined Type of Review and calculating a credit score for the credit requestor.

Updated searches revealed no references that disclosed the claimed invention, nor were any further references identified which could be reasonable combined with *Lichty* reference. For this reason, claims 1, 34 and 61 are deemed to be allowable over prior art of record and claims 2-27, 35-60 and 62-87 are allowed by dependency.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reason for Allowance".

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
